## **Federal Package® Finalist for Global Sustainability Product of the Year**

CHANNHASSEN, MN —September 7, 2021—Today, the Business Intelligence Group named Federal Package® a finalist for the Sustainability Product of the Year, in the 2021 Sustainability Awards program. The Sustainability Awards honor those people, teams and organizations who have made sustainability an integral part of their business practice or overall mission.

“We are honored to be chosen as a finalist in this group of organizations that have also made sustainability an integral part of their businesses,” said Melissa Niebes, Chief Commercial Officer at Federal Package. “We know brands have unique sustainability objectives, so we consider the entire product lifecycle, from raw materials to end-of-life management and develop solutions that minimize carbon footprints and material waste.”

Federal Package’s Eco Smart® containers are an earth-conscience sustainability solution for the global personal care market that is fully FDA compliant and made in the USA. This proprietary technology enables plastic components to break down in biologically active environments, independently tested to ASTM D5511 (municipal landfill) and ASTM D6691 (marine) protocols and demonstrate excellent biodegradation rates. Plastics made with Eco Smart provide the same form, fit, and function as our standard line of containers and can be made with a variety of resins including PCR, PIR and bio-based alternatives. They are fully recyclable, but when they are disposed of in a biologically active landfill they also break down into base elements, unlike normal plastics that can produce micro-plastics.

“We are proud to reward and recognize Federal Package for their sustainability efforts,” said Maria Jimenez, Chief Nominations Officer, Business Intelligence Group. “It was clear to our judges that their vision and strategy will continue to deliver results toward a cleaner, more sustainable world. Congratulations!”

###

**About Federal Package Network Inc:** Federal Package is a premier turnkey, value added manufacturing partner and manufacturer of injection molded propel repel containers for deodorants, lip balms, sun sticks, cosmetics, and other personal care products. We are FDA-registered, organic certified and offer a full range of services including formulating, compounding, filling, decorating, and retail ready pack out.
